GENERAL PROVISIONS

Regulations for using services

The General Terms and Conditions of SEEHAFEN KIEL Stevedoring GmbH (SK Steve) apply.

Basis for calculating charges

1. Unless another calculation basis is stated, the usage of services provided by SK STEVE is based on the gross weight of the consignment.
2. Unless agreed otherwise, the weight units used for calculating the charges are rounded up to full 100 kg. Each started hour is rounded up to the full hour.
3. If an order includes cargo governed by different tariffs that are not separated by quantity or weight, the charge for the whole consignment is calculated on the basis of the highest tariff rate applying to part of the consignment.
4. When loading goods that have not been weighed, charges are calculated based on the bill of loading, the loading note or the consignment note.
5. The principal has to provide all data required for calculating the charges and guarantees their accuracy. If data are missing or incorrect, SK Steve can estimate the data or replace with its own assessment at the cost of the principal.
6. In the case of services not included in the tariff, the principal shall reach written agreement with SK Steve on the charges in advance. If this does not happen, the charges levied by SK Steve are deemed to be agreed.
7. The charge rates of this tariff are net rates. Statutory value added tax is added to services liable to value added tax.
8. In case of any divergence between the English and the German version of this tariff the German version shall prevail.

Liability

The General Terms and Conditions as issued by SEEHAFEN KIEL Stevedoring GmbH and the General German Carrier Conditions (ADSp, latest version) do apply which we will send you on request.

Section 23 ADSp includes limitations of liability which differ from those stated in the German Commercial Code (HGB). They limit the legal liability for damage to goods according to § 431 HGB amounting to 8.33 SDR/kg to 1.25 million Euros per event of damage resp. to 2.5 million Euros per loss event or to 2 SDR/kg whichever amount is higher and regarding intermodal transport including sea transport and unknown location of damage, the aforementioned legal liability is generally limited to 2 SDR/kg.
